# Case In Point: Complete Case Interview Preparation (10th Anniversary Edition)

## **Synopsis**

Cosentino demystifies the consulting case interview. He takes you inside a typical interview by exploring the various types of case questions and he shares with you a system that will help you answer today's most sophisticated case questions. This new edition includes new case material plus 10 Partner cases to make it easy to give cases to your classmates.

## **Customer Reviews**

Case in Point is a must read for people who are serious about getting a consulting job. Having said that, this book will not help you get a consulting job unless:(a) You are already interested in business; and(b) Have good common sense; and(c) Are comfortable with quantitative questioning; and(d) Have good interviewing skills; and(e) have an impressive enough CV to get an interview. The above does not apply if you are one of those exceptional people who will probably receive offers everywhere you go (in which case the book may still be useful nonetheless). After reading this book I interviewed with both Bain and McKinsey (for AC and BA positions) as well as with a number of investment banks. Ultimately I received a couple of offers at investment banks, was knocked out in the second round at Bain and received an offer from McKinsey. Surprisingly the concepts I learnt in the book helped me with my IB interviews (at places such as Merrill Lynch and Morgan Stanley) as once they establish the basics (ie you can do DCF and understand undergraduate finance 101) they quickly move to strategy-type questioning where people familiar with consulting frameworks have a massive advantage. Advantages of the Book The advantage of this book is that it gives you a number of frameworks which can be adapted to answer pure strategy questions. I am aware of no

other books that give you such detailed frameworks. The book then gives you a large number of practice questions (most of them are 'allegedly' based on real interviews), shows the implementation of those frameworks in candidate answers and then critiques those answers.
