Customer Reviews

I am a huge fan of the BarCharts and have many. This one is nicely laminated, fits well in a binder or just by itself. They are great for a quick reference, supplementing your textbooks, or having in your workplace for a quick look. I do realize that in a world of Google some might think these obsolete. For me nothing can beat something tangible. I have not been disappointed with any of the BarCharts that I have purchased. I have purchased them for me and both of my sons to supplement their college courses.

I just wish I had ordered these before taking my Medical Assisting Course. They are perfect for quick references and because they are laminated they will last and can be used at the place of employment. I acquired them to assist me in preparing for my certification test that is coming up pretty quick. I am very pleased with the product.

These quick reference sheets are always a great item to have. They are much faster to reference than looking up something on a tablet or book. I would strongly recommend this series of visual aids to any working professional or aspiring student, they will make your life easier both in the clinic and classroom.

New practitioner and this is helpful for a quick reference for charting.

I am in OTA school and we were learning about digestive system this is a great quick reference. When you have to put so much up in your head it is nice to have a quick way to refresh all the info.

Highly recommend this series of charts. Found them useful for Bio. Anticipate they will be of more use in A&P.

Like all of these charts, it is very thorough and helpful. Also very sturdy.

great reference for any anatomy class; easily fits in a backpack
