Netter's Histology Flash Cards, Updated Edition

Synopsis

Take your understanding of histology one step further with Netter's Histology Flash Cards. Specially designed to help you master what you need to know, these 200 flash cards are designed to reinforce your understanding of how the human body works in health as well as illness and injury. Classic anatomy illustrations from medical illustrator Frank H. Netter, MD provide strong visual aids and memorable diagrams to facilitate learning. Extensive additional images, including light and electron micrographs, provide an even more comprehensive study experience. Review salient microscopic features of cells, tissues, and organs of the body thanks to beautiful Netter illustrations and histology slides. Study basic biological and histological principles as well as the clinical relevance of histological structure and function through concise textual summaries. Recognize and interpret microscopic sections quickly thanks to an at-a-glance organization. Master the histology knowledge you need to know by using these flash cards in conjunction with Netter's Essential Histology, 2nd Edition, also by Drs. Ovalle and Nahirney. They're completely cross referenced to the Netter's Essential Histology text so it's easy to find more in-depth information on any topic.

Book Information

Cards

Publisher: Saunders; 1st edition (August 28, 2013)

Language: English

ISBN-10: 1455776564

ISBN-13: 978-1455776566

Product Dimensions: 4.5 x 2.7 x 6.6 inches

Shipping Weight: 2.2 pounds (View shipping rates and policies)

Average Customer Review: 4.2 out of 5 stars Â Â See all reviews Â (9 customer reviews)

Customer Reviews

Pros: Great-looking diagrams. Cards are shiny and sturdy with holes in the upper left corner and come with a ring. They include clinically relevant information. The cards themselves are aesthetically great. Cons: a.) The back of the cards: Very low yield in the sense that there are maybe ~2 concepts per slide and lots of trivial information. I found the back very unhelpful! They DID NOT tell me what I

needed to know for histology. If you want good content, I highly recommend Lange's flash cards, which I found out about only after I already bought Netter's.b.) I had a lab portion on my exams so needed to make sure I could identify structures on both light microscopy and EM. When you look at these flashcards, they have diagrams/illustrations that show idealized views and that's the problem: They're idealized. Disregarding the back of the flash cards which I found completely unhelpful, the idealized views may help you learn the basics. In my case, however, the front of the cards detracted from my ability to learn how to identify structures in real life and on lab exams. I would look at a flashcard and immediately be able to identify the cell type/structure/etc. from the diagram they gave, but it did not help with real life. At least on the cards I saw, even if there was a micrograph/photo on the card, there were diagrams with it, and since your eyes jump immediately go to the idealized diagrams, you can easily identify what you are looking at. If anyone has had a different experience with this, then please comment. I am just sharing mine. The front was too idealized, and the poor content in the back disappointed me highly.If you want very pretty cards, Netter's is for you. If content's important, then I recommend Lange's. I really wish I could give these cards a 3 because Dr. Netter's artwork (illustrations, not actual photos) are great, but these cards were a waste of my money. Sadly, I could never use them.

These laminated cards made a big difference in my histology preparation. They are informative, thorough and the pictures help to get a good grasp of important structures. Since they are portable, they are easy to carry to the library or a coffee shop. I recommend these cards to anyone who wants to enhance their preparations in histology.

Exactly what I needed! While nothing replaces a textbook and talented professor, this is a great way to test your knowledge while out and about or waiting somewhere. Repetition is key for memorization. For my medical school class, the knowledge/explanation on the cards regarding each structure is sufficient.

These cards helped a lot for histology practical. I would recommend these flash cards for any level histology course.

Awesome flash cards, love the fact it comes with a ring so it will be easy to maneuver when studying :)
